- very cool layout!! Love it
 - color scheme paring really well
 - love the font you chose
 - great choice of imagery to supplement the text
- some questions:
 - Is the image on the home page gonna be a video? Do you have any concerns about embedding a video in html?
 - Will try to make the home page a video, otherwise a large image might have to do.
 - the Nintendo logo disappears on the other pages, is it a design choice or do you wanna put that logo on those pages as well
 - Still working on the placement of the logo on /next to ul grid, intends to be consistent on each page.
 - really love the font you chose for “**Explore a World of Adventure**” Do you plan to use it anywhere else?
 - Really good idea to put an attractive title.subheading on each page! Will do that for each page to make the game seem more interesting.
